

Product Data Sheet

Factory and HD Touch-Up Marker (6ml wood/furnishing repair marker)

762XXX/765XXX

Overview: Dover Finishing Products HD and Factory Touch-Up Markers are designed to hide scratches and other surface imperfections as well as to restore colour to worn areas on a wide variety of wood and finished surfaces. The patented synthetic tip will resist indenting after working on edges while maintaining a fluid flow, while the HD brush tip provides long strokes without any loss of colour intensity or uniformity. The Factory plastic tube and 2-click cap seal ensure improved longevity of the marker

- Easy repair of scratched and worn areas
- Resistant, fluid flow acrylic tip
- Can be used for fine or broader stroke repairs
- HD marker brush tip provides long stroke applications without losing colour intensity
- No need to topcoat, but compatible with most finishes
- Factory Marker 2-click cap seal for increased longevity

Key properties

Transparent, transparent-wood tones and transparent grey-tones

Semi-gloss sheen

Darkens with each application

Average dry time: 3 minutes

Average time to recoat: 30 minutes

Shelf life: 2 years

Directions

Apply in the direction of the scratch and use a cloth or your thumb to wipe excess outside of the repair area. For worn areas, apply the markers along wear, wiping excess as quickly as possible before drying. Top coat if necessary.
