

# FUSION™

## MINERAL PAINT

With excellent adhesion, coverage and durability, your piece is bound to last for many years to come. A little prep goes a long way! For optimum results it's always best to spend a little time assessing and prepping your piece.

### PREP

Ensure your piece is free of dirt, oil and grease.

Clean well (TSP can be used to break down oil/grease) and rinse well.

Laminate  
Glass  
Metal  
Plastic?

Microfibre roller is recommended to avoid getting brushstrokes, or bubbles from a foam roller.

Roll on a very thin coat of Ultra Grip with a microfibre roller.

High Gloss  
Paint?  
Lacquer?  
Varnish?

Scuff sand with 220 grit and remove dust

Old furniture  
with dull  
finish?

Bleed  
Through?  
Knots  
to Seal?

Apply  
BIN Shellac  
Primer

Wax?

Scratch the surface; wax will accumulate under your finger nail.

Remove with odourless solvent or mineral spirits.

We encourage a light sanding just to ensure the wax is removed.

Paint it beautiful.

## APPLICATION

You're bound to paint it beautiful with our Fusion brushes & accessories. Want that old world, hand painted look? Use our natural bristle brush. Looking for a flawless finish? Use our synthetic brush or microfiber roller. Our synthetic/natural blend Staalmeeester brushes offer a superior flawless finish. An excellent investment for the avid painter.

- Apply with light pressure of your brush to glide across the surface with enough paint on your brush that you do not see paint lines left behind. If you see lines, remove excess paint off your brush and apply with a lighter touch.
- Recoat after 2 hours. On surfaces with a glossy finish or where Ultra Grip was used, wait 12 hours between coats for best results.

Tip

Create a wash with any colour by just adding water!

Tip

Paint the impossible - metal, glass, laminate, plastic by first applying a thin coat of **Ultra Grip**. This is also a great product to use on ornate pieces that are impossible to scuff with sandpaper!

### Distressing is EASY with Fusion™!

**Rustic Look:** Use a 220 grit sandpaper to distress and wear away to your desired look. For an aged or washed out look, try dry brushing. Dab your brush into paint, remove excess leaving your brush feeling dry, then brush over top.

**Natural Look:** Wet distress with a damp cloth 30 minutes after application.

Tip

Distressing couldn't be easier with our **Beeswax Block**. Press block along edges and areas you wish to distress between layers of different colours. Paint applied on top of the beeswax will easily come off when wet or dry sanding.

## FINISH

- Fusion™ has a built in top coat that is very durable, stain resistant and water-proof once cured (approximately 21 days).
- Fusion dries to a gorgeous soft, matte finish. For an increased sheen, add our **Wax Finish** available in Black, Espresso and Metallic Tints for added effects.

- Our **Tough Coat™ Matte Wipe-On Poly** is a non-yellowing finish that provides superior durability for super high traffic areas such as kitchen cabinets or table tops.
- **Fusion Hemp Oil** is a gorgeous finishing product, specifically for bare wood, new or old, to give it a hydrated look.

Tip

Build your confidence, learn the basics + great techniques in a Fusion Workshop from your local Fusion Mineral Paint merchant!

## ACCENT

Give your piece a little something extra! Fusion™ offers a full range of accents to achieve a range of faux finish effects.

- **All in One Stain & Finishing Oil**  
This durable wood stain is excellent for table tops or flooring while adding a rich tint, available in 6 colours.
- **Smooth Embossing Paste - Pearl**  
This gorgeous easy to use zero VOC medium is tinted an iridescent pearl. Can be pushed through stencils to create raised patterns and texture. Can be tinted with the tinting kit or Fusion™ paints.
- **Metallic Paints** These rich hues offer a gorgeous iridescent shimmer, made with pure mica pigments.
- **Decoupage & Image Transfer Medium**  
Transform your pieces with beautiful image transfers. Take any printed image and transfer it to your piece with this simple and easy to use one step medium.
- **Glaze** Achieve faux finish effects with our clear and antiquing glazes.
