Mirlon Total[®]

– the innovative choice
for a rapid result

Quality from start to finish

Mirlon Total® is mainly developed for mattening of hard-to-reach areas, such as corners and profiles, prior to painting. It is also used when feathering out, removing overspray in a blending zone and for spot repairs. In the wood sector Mirlon Total is also excellent for intermediate sanding.

Developed using Mirka's innovative Total Coating Technology, Mirlon Total is more aggressive than Mirlon and produces a dense scratch pattern and a rapid result. Mirlon Total is suitable for use in wet and dry modes, it features an open and flexible structure and strengthened fibres which make it strong and long-lasting.

Mirlon Total®

Technical Data	
Grain	Aluminium oxide (VF), Silicon carbide (UF, MF)
Bonding	Resin
Backing	Non-woven
Coating	Three-dimensional Total Coating
Colour	Red (VF), Grey (UF), Beige (MF)
Grit range	VF 360, UF 1500, MF 2500

Suitable for

- Automotive Refinishing
- Paint & Decoration
- Wood Processing
- Metal Processing
- Composites Processing
- Marine Industry
- Vehicles Manufacturing

Available as sheets and rolls.
